

AMEL ISLAMOVIĆ

SOFTWARE ENGINEER

PROFILE

Software engineer with three years of experience. In addition, I competed at the state level in algorithms (problem-solving). The combination of my skills in programming languages and algorithms allows me to approach software development with a wide range of knowledge and skills.

WORK EXPERIENCE

SEFCast

NOVEMBER 2024 - PRESENT

Software Engineer (React, Supabase, WordPress, WeWeb)

- Building and maintaining front-end applications with React, Supabase, and WeWeb to enhance user experience.
- Integrating and customizing WordPress solutions to align with modern web development standards.
- Collaborating with designers and backend developers to ensure seamless functionality and performance.

Cloud Vyre

JUNE 2024 - OCTOBER 2024

Software Engineer (TS - Express, Python, Azure)

- Focused on developing and maintaining robust Azure monitoring solutions that enhance the reliability and performance of clients' cloud infrastructure.
- My role involved building and optimizing data pipelines, creating insightful BI dashboards, and automating deployment processes to ensure seamless operations across Azure environments.

Data Rights Management

MARCH 2024 - JUNE 2024

Software Engineer (TS, Python, AWS)

- Developed a data rights management system using sst.dev with AWS, integrating S3 for storage and Lambdas for serverless execution.
- Implemented Python-based workflows for processing and managing data, ensuring compliance with data access policies.
- Integrated Weaviate vector database for advanced data searching and management, enhancing data retrieval and handling capabilities.

Upwork

AUGUST 2023 - MARCH 2024

Freelance Software Engineer/Instructor (Python/Node.js)

- Developed automation solutions with Python for various client projects, optimizing task execution and workflows.
- Delivered standalone instructional content, guiding clients on technical topics and helping them implement best practices.
- Provided Python-based automation services alongside comprehensive instructions for clients to manage and extend their solutions independently.

Third party GTA V UIs

JANUARY 2021- AUGUST 2023

Freelance Software Engineer/Front-end (React, Vue)

- Designed and implemented over 100 user interfaces in React and Vue for the RAGE.MP platform, enhancing the visual and interactive elements for custom GTA V mods.
- Delivered high-performance, responsive UIs tailored to unique gameplay needs, contributing to seamless user experiences within the RAGE.MP environment.

EDUCATION

2024 - 2028 (Expected)
INTERNATIONAL UNIVERSITY
OF SARAJEVO

- Bachelor of software engineering

2020 - 2024
BEHRAM - BEGOVA
MEDRESA TUZLA

- Gymnasium

SKILLS

- Javascript / Typescript
- Node.js / Express
- React / Next
- Python
- Git / Github
- Linux CLI (servers also)
- Azure
- AWS
- C++

LANGUAGES

- English (Advanced)
- Bosnian (Fluent)
