

Software Developer

Islamović Amel

Profile

Developer with three years of experience in React. In addition, I competed at the state level in algorithms using the C++ programming language. The combination of my skills in React and algorithms allows me to approach software development with a wide range of knowledge and skills.

Education

Behram-begova Medresa Tuzla Sep 2021 - Today
Islamic School

Employment

Full-stack developer at OnlinePokloni March - May
In the role of full-stack developer, I was responsible for creating an e-commerce platform with accompanying dashboard, using Next.js framework and Supabase as backend.

Front-end developer at Ephorize Sep 2022 - June 2023
As a part-time front-end developer, I was engaged in a project for a single server on the Rage platform. My main task was developing the user interface (UI) using the React library.

Lead front-end developer at Genesis Now
In my current part-time role, I serve as a dedicated React developer, responsible for managing and enhancing our existing codebase. My primary focus is on crafting intuitive and visually appealing UIs.
